EDUCATION

University of South Florida | **BS in Computer Science** | Tampa, FL

May 2026

Coursework: Database Design, Data Structure, Algorithms & Analysis, Web Development, OOPS Concepts

SKILLS

Programming: Python, Typescript, C/C++, C#, Java, HTML, CSS, JavaScript, PostgreSQL, MySQL, Verilog, RISC-V

Frameworks & Libraries: Express.js, Flask, React.js, Node.js

PROJECTS

BiteBasket - Recipe Website  | HTML5, CSS3, JavaScript, API Integration

Jan 2025

- Built a responsive recipe discovery platform with mobile-first design, serving content from DummyJSON API
- Implemented interactive modal system and smooth navigation, enhancing user experience across all devices
- Deployed live website using GitHub Pages, demonstrating full-stack development and deployment skills

Live Demo: [Here](#)

Chef Claude - AI Recipe Generator Web Application  | React, TypeScript, Claude API, Vite

May 2025

- Built a responsive web application that generates personalized recipes using Claude AI API integration
- Implemented component-based architecture with TypeScript for type safety and enhanced developer experience
- Deployed on Vercel with Git integration for continuous deployment, resolving complex build and merge conflicts
- Features dynamic ingredient management system and real-time recipe generation with smooth user interactions

Live Demo: [Here](#)

Prepd - Meal Planning Website | React, TypeScript, Firebase, Gemini API, Spoonacular, Vercel

Jan 2026

- Built a full-stack meal planning platform for college students with AI-powered weekly meal plan generation using Spoonacular API and Google Gemini, featuring personalized calorie and macro targeting
- Implemented role-based access control with Firebase Google Auth, Firestore, and a complete admin dashboard for menu management, order fulfillment, and automated email notifications via Resend
- Deployed on Vercel with serverless API routes for AI insights, image uploads via Cloudinary, and CI/CD via GitHub auto-deploy

EXPERIENCE

USF Housing & Residential Education | *Student Operations Assistant* | Tampa, FL

Apr 2024 – Present

- Lead training programs for new student clerks, developing standardized onboarding processes that improved team efficiency
- Collaborate with cross-functional teams to enhance data quality and accuracy in resident information systems
- Resolve complex operational issues requiring problem-solving and leadership, serving as escalation point for front-desk staff
- Streamline daily operations through process improvements and proactive issue identification

USF Housing & Residential Education | *Housing Services Clerk* | Tampa, FL

May 2023 – Apr 2024

- Delivered exceptional customer service to 200+ residents daily as primary front-desk representative
- Managed confidential resident information and package distribution systems with 100% accuracy and data security compliance
- Built trust with diverse student population through consistent, reliable service and professional communication
- Promoted to Operations Assistant role after demonstrating high standards and collaborative leadership

LEADERSHIP/STUDENT ORGANIZATIONS

Computer Science Society at USF | *Mentorship and Event Planning Chair* | Tampa, FL

Aug 2024 – Apr 2025

- Mentored first- and second-year CS students on how to take app ideas from concept to execution using user stories, MVP scoping, and simple project planning tools
- Fostered a supportive space where newer students could share ideas and collaborate without fear of judgment
- Helped 10+ students build their first complete projects by breaking down complex goals into actionable next steps
